

Bank of Dade - Coronavirus (COVID-19) Statement

Operational Changes due to COVID-19

Bank of Dade will remain open to meet your financial needs.

EFFECTIVE MONDAY, MARCH 23, 2020

Your well-being is our top priority. In an effort to protect our customers, staff, and community, we will be limiting face to face interactions as recommended by public health officials.

Our main office lobby will be restricted to appointments only. To open an account or apply for a loan, access our online applications at www.bankofdade.com or contact our main office at 706-657-6842 or customerservice@bankofdade.com. We may be able to complete your request electronically, but if not, we will schedule an appointment for you. Other services available by appointment include the following:

- Safe Deposit Box access
- Wire Transfers
- Official Checks and Money Orders

Cash Advances will now be available at our Hwy 136 location only.

Both drive thru locations will be open for transactions during normal business hours. The main office drive thru located at 12660 North Main Street will have increased availability with the same hours as our 4995 Hwy 136 location. Those hours are Monday – Friday 7:30am – 6:00pm and Saturday 7:30am – 12:00pm.

Bank of Dade also has many digital channels for transaction services such as:

- Online Banking
- Bill Pay
- Mobile Banking - including Mobile Deposits
- eStatements
- Telephone Banking – 706-657-8227

Unfortunately, fraudsters take advantage of times of uncertainty. As you are following recommendations to protect your health, continue to also be vigilant to protect your personal information. Remember that Bank of Dade will never contact you to ask for login credentials or passwords.

Should the COVID-19 situation cause you to face financial difficulties, please reach out to us. We want to work with you and will discuss options that could help your family or business.

We are monitoring this situation closely and will update you through our website, email, and social media channels. Please follow the recommendations of medical professionals and the various health organizations and know that we are following these best practices as well.
